

Cougar Chain & Bar Oils

November 10, 2010

DESCRIPTION;

Cougar Chain & Bar Oils are manufactured using selected Virgin re-blended base Oils; they are not made from “used” or “recycled” oil.

The base oils have been subjected to extensive drying and cleaning using our exclusive technology, “OSCAR”, and when finished are drier and cleaner than any other base oils.

The base oil is then subjected to lab testing to ensure suitability, then blended with Polymers to correct the viscosity (Polymers also add to the finished product lubricity) and then further blended with extreme pressure, antiwear and tackifier additives in “overdose” proportions.

Cougar Chain & Bar oils exceed the performance capabilities of other Chain & bar oils and are well suited to Commercial applications.

ADVANTAGES;

- * Less wear; anti-wear additives are in “overdose” proportions
- * Less “fling off”; tackifier additive is also in “overdose” proportion reducing lubricant loss
- * Extremely cost effective

Typical Specs;

Product iso grades	iso100	iso125	iso150	iso200
Product codes	c292	c293	c294	c296
Viscosity, cst @ 40 degC.	100	125	150	200
Colour (all grades)	Colour varies due to types of base stocks used			
Tackiness	All grades are very tacky			

Available sizes	iso100	iso125	iso150	iso200
1 litre	n/a	yes	n/a	yes
5 litre	n/a	yes	n/a	yes
20 litre	n/a	yes	n/a	yes
205 litre	yes	yes	n/a	yes
1000 litre	yes	yes	yes	yes
